

Benefits of Windows Virtual Desktop

1

Bring your own device

Remote employees can securely access company resources from their own unmanaged devices.

2

Device cost

Run programs inexpensively from your devices, such as thin clients, Chromebooks, and NUCs.

3

Virtualisation

Reduce unused processing power based on the user's and team's needs.

4

Whitelisted access

Create virtual workspaces securely with Windows Virtual Desktop and Azure NAT Gateway.

5

No VPN slowdown

By migrating to Windows Virtual Desktop on Azure, you gain more scalability for crisis events.

6

Working remotely

Windows Virtual Desktop allows you to easily work from home.
