

# Providing business flexibility through a range of public, private and hybrid cloud services

The cloud provides your business with the ability to focus on its ideas and growth rather than its IT infrastructure. Rehosting applications in the cloud delivers endless possibilities, building the best foundations for a scalable future. You and your team will have more time to concentrate on the projects that matter.

## WHAT WE OFFER

Frontline can help deliver a full cloud solution. Our roots are from mainframe system, networking, security, Windows and Linux physical and virtual servers, through to today where we offer Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS) across on-premises, private, public and hybrid cloud provision.

We work with a range of vendors in the public cloud space so that we can offer Frontline Service Desk, Service Delivery or administration and management service to wrap around your cloud solution for maximum availability and support.

*'We started working with Frontline because we wanted to partner with an innovative and robust hosting partner who value cyber security as integral to core business operations. We've been really impressed with the support provided by Frontline from day one. The team are professional, extremely knowledgeable and we're confident that our systems are incredibly secure.'*

*– Nick Tucker, X3 Consulting*

# Why Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge - we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

**Microsoft Azure is an ever-expanding set of cloud computing services to help your organisation meet its business challenges. With Azure, your business or organisation has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.**
